. . . . what's happening at Wick

3rd Quarter, 2005

CURRENT PROJECTS

Kingston High School, Kingston, WA (Job 704)

*George Mason, Superintendent
Steve Hansen, Project Manager
Nathan Kirstein, Project Engineer
Karen Moon/Brittany Vaders, Administration*

Wick is working on the north building foundations and subcontractors are working on electrical & mechanical underground services in that area. Utilities and earthwork activities are going full speed ahead, with steel erection slated to start approximately November 7 on this building. The south building has footings poured and masonry walls for the gym rising. With less than perfect soil conditions, every effort is being made to make as much progress as possible before the rainy season hits.

**Kennydale Elementary School, Renton, WA
(Job 705)**

*Dana Malek, Superintendent
Terry Lavin, Project Manager
Kelly VanHooser, Administration*

Despite encountering unexpected materials during excavation activities – old foundations, logs, stumps, etc., and a small plane crashing into the building to be demolished, this \$13.2 million project is proceeding well. The east wing foundation and detention vault are poured and we hope to place ATB during the first week of October.
